Evidence-Based Guidelines To The Point Of Care

E*HealthLine's comprehensive and robust **PHOENIX**© Electronic Medical Records contain vital patient information including documentation, guidelines and orders for the enterprise, hospitals, and the physicians' office. **PHOENIX**© Electronic Medical Records for the physician enterprise enables physicians to focus on the practice of medicine and meet the increasing demands of delivering cost-effective, proactive, quality healthcare.

PHOENIX© Electronic Medical Record provides lifelong clinical information to care providers whenever and wherever this information is needed. **PHOENIX**© EMR obtains this information from all points throughout the enterprise (hospitals, physician offices, and clinics) and displays it in integrated views at the point of care. With E*HealthLine's integrated, web-based technology, the EMR is updated in real time.

PHOENIX© Electronic Medical Records allow the exchange and documentation of clinical information at the point of care between healthcare provider and users.
