

VITAL[®] Integrated Personal Health Records Bank

The VITAL[®] Integrated Personal Health Records technology enables accessibility to secure online Integrated Personal Health Records, containing one of the most robust and sophisticated networks of Electronic Medical Records available in today's healthcare arena. This solid platform and infrastructure is where consumers, providers (physicians, hospitals, laboratories etc.) and care managers can capture, exchange, review, update, track and manage personal health information.

Consumers can store their health data in one location and use this essential information anytime, and anywhere. This innovative integrated technology provides shared VITAL PERSONAL HEALTH RECORDS with family members and/or healthcare providers.

VITAL[®] Integrated Personal Health Records provides the Consumers with the ability to initiate, retain and control their unique health records, which interfaces with their providers EMRs and health plans.

VITAL[®] Integrated Personal Health Records interactive features provide real-time communications for prescription refill, and physician consultation.

VITAL[®] Integrated Personal Health Records incorporates customized educational programs tailored to meet the needs of an individual's healthcare requirements. The System also provides; secured HIPAA compliant online reminders; access to personal medical information, and; the ability to share health records. As a precaution in expediting medical information during an emergency, VITAL[®] Integrated Personal Health Records are also stored on a driver's license and/or a wallet size swipe card, enabling accessibility within a medical environment, anytime and anywhere. VITAL SmartCard[®] operates like an ATM card and facilitates deposits, withdrawals and transfers of selected health information from an individual's "Personal Bank of Health Account".

The VITAL V-Visits[®] and VITAL SmartCard[®] along with the integrated VITAL Wireless[®] technology, enables accessibility to secure Personal Health Records, driven by one of the most robust and sophisticated Electronic Medical Records System available within the healthcare industry of today.
