

Clinical Messaging System® Integrated Messaging Information Management System

Simple, Secure, Mobile -Based Technology That Facilitates The Exchange Of Clinical Information

The Clinical Message System is an intuitive and easy to use web-based clinical messaging application, enabling healthcare Providers to securely communicate and share healthcare information with other providers across the network for clinical interoperability and in support of patient care.

E*HealthLine's Clinical Messaging Network for Clinical Interoperability expands the Providers ability to quickly and easily send and receive secure messaging among Providers and across health systems networks..

Clinical Message System allows Providers to connect and communicate with healthcare participants anywhere in the world, utilizing any mobile device or computer. The Messaging System provides the ability to communicate electronically and exchange clinical information more quickly and efficiently, as opposed to current options such as faxes, phone or mail.

SYSTEM FEATURES

1. Share immediate health information electronically among colleagues, across Practices and EHR Systems for patient care
2. Improve Practice efficiency by replacing fax communications with secure, traceable electronic messages, regardless of location, health system or EHR affiliation
3. Facilitates meaningful collaboration and secure communication around patient care by electronically sharing care summaries, referrals, and lab results
4. Delivered across a reliable, trusted, neutral connectivity network
5. Supports federal and state policies and standards for health information exchange, including privacy and security standards
6. Helps improve continuity of care and the advancement of patient-centered medical homecare
7. Supports vital components Meaningful Use requirements
8. Secure Messaging
 - E*HealthLine's text messaging enhances delivery of real-time patient information to healthcare professionals
 - Directly / immediately provides physicians and clinicians with required patient information
 - Allows clinicians to send and receive encrypted, HIPAA-compliant text messages containing important Protected Health Information (PHI) from mobile phones.

E*HealthLine is a premier provider of secure online healthcare communication services linking patients, healthcare professionals, payers, and pharmacies.

"Specializing In The Standardization Of Global Healthcare Management"

E*HealthLine's Web- Mobile based Physician-patient messaging platform connects Providers and their patients efficiently, affordably, and securely.

Created for the group practice environment, the E*HealthLine clinical Messaging service improves and streamlines healthcare delivery and access through modular features built around clinical structure, practice workflow and reimbursement, featuring the E*Visit Clinical Consultation. Results from an independent study have indicated that both patients and physicians prefer E*Visits, rather than an office visit for non-urgent needs, and that E*HealthLine effectively reduces the cost of care.

E*HealthLine's Clinical Messaging Platform Provides:

1. Continuity of *Care Documentation* – Messaging Exchange
2. New Medication Providers Alerts
3. Latest Medication Benefits Information
4. Clinical Trail Provider Alerts
5. Medication Adherence
6. Medication Alerts
7. Medication Warnings
8. Drug Coupon Sponsored Messages
9. Patient Engagement Tools
10. Rx Refill and Vaccination Reminders
11. Medication Reminders
12. Wellness Health Information
13. Wellness and Weight Management
14. Chronic Disease Management
15. Discharge and Re-admission Reduction Management
16. Surveys & Feedback Questioners

Clinical Messaging System's Features and Benefits:

- Lower cost and higher efficiencies, providing greater profitability in return on Investment
- Enhanced reliability that consistently provides increased information and delivery rates
- Scalability that expands to meet volume needs, especially during peak facsimile periods
- Enhanced security and regulatory compliance procedures

E*HEALTHLINE SIGNIFICANTLY REDUCES REDUNDANT BUSINESS ENCOUNTERS

AND

ENABLES THE ABILITY TO OPTIMIZE TODAY'S OPPORTUNITIES,

WHILE PLANNING STRATEGICALLY FOR TOMORROW
